

Reporting Services Health Check

DNM Technology was formed in 2000 by a group of leading IT technology specialists.

It's goal is to become a leading infrastructural services company specialising in:

- Enterprise database solutions from Oracle, Sybase & Microsoft
- Virtualisation technologies from VMware, Xen and Microsoft
- Enterprise high-available SAN solutions from EMC, Dell, Fujitsu and HP
- Infrastructure design
- Performance diagnostics and troubleshooting
- Disaster recovery design and implementation
- Enterprise system management solutions from Nimsoft, BMC, Bradmark & Quest
- Storage & backup solution from Symantec and EMC

Are business users saying the reporting system is now unacceptable?

Even with a small number of users is the performance of the reports erratic and slower than your older systems?

Have you got hundreds of reports and spend a lot of hours implementing yet another custom report?

Our expert team can help!

DNM Technology provides independent expert-lead IT assessment services, producing an end to end in-depth evaluation and analysis of your reporting services.

Our reporting service Health Check allows you to get an accurate baseline of your reporting system and immediate practical recommendations to improve performance, scalability, usability, lower maintenance costs and reduce custom reporting costs.

We have helped a number of customers reduce the amount of time spent sorting data therefore reducing costs all by embracing the full analytical and reporting capabilities of their inherent key business tools.

Benefits

Our service offers a cost effective objective insight, preventative advice, troubleshooting and recommendations.

- Determine the health and viability of your reporting services
- Performance analysis baseline and comparison to what should be expected
- Scalability analysis determining what your current system architecture can achieve and recommendations on the necessary steps to meet future scalability requirements
- Immediate configuration and optimisation to often dramatically improve reporting performance and predictability
- Recommendations to reduce costly custom reporting needs

DNM Technology are proud to have worked with a range of different companies in different sectors.

Below is an example of some of these companies.

Our Methodology

Using best in class assessment frameworks and diagnostic techniques, covering architecture, usage patterns and business needs, we will:

- Measure performance quantitatively and compare against expected industry norms
- Evaluate the proposed or implemented technology to determine whether it meets your market Business needs (usage, functionality, performance, resilience and comprehensibility)

We are passionate about providing an intelligent, constructive and relevant assessment & analysis and in doing so adhere to the highest standards of independence, objectivity and technical excellence.
