

ARE YOU INTERESTED IN
REDUCING YOUR COST
AND IMPROVING YOUR
EFFICIENCY ?

OUR BUSINESS
INTELLIGENCE
DASHBOARD CAN HELP.

According to **Mark Bailey**, President of the **Irish league of Credit Unions** Business Intelligence is vital for Credit Unions: "Credit Unions need to analyse a vast array of data to make informed decisions on a daily basis. The Business Intelligence service will facilitate and simplify much of this work by providing credit unions with access to key information at the click of a button."

"We are able to see the benefits immediately. Users can now display and analyse the data they need in real time, without the intervention of IT. Complex relationships can be easily correlated and graphed to reveal issues in Process Efficiency and Effectiveness." Says **Ian Kelly**, Pfizer's Loughbeg plant

simplifying **IT**

Technology at work for you

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

DNM's Business Intelligence Dashboard reduces effort and eliminates errors by extracting your data from your underlying systems and applications, presenting them in a visually rich format.

This enables you to accelerate quality improvements, optimise machine capacity and reduce time-to-market cost-effectively.

flexible solutions for your business needs

CUSTOM SOLUTIONS

We recognise that no two organisations are the same. Our team is uniquely placed to capture, analyse and implement your requirements and constraints, quickly and accurately.

WEB SOLUTIONS

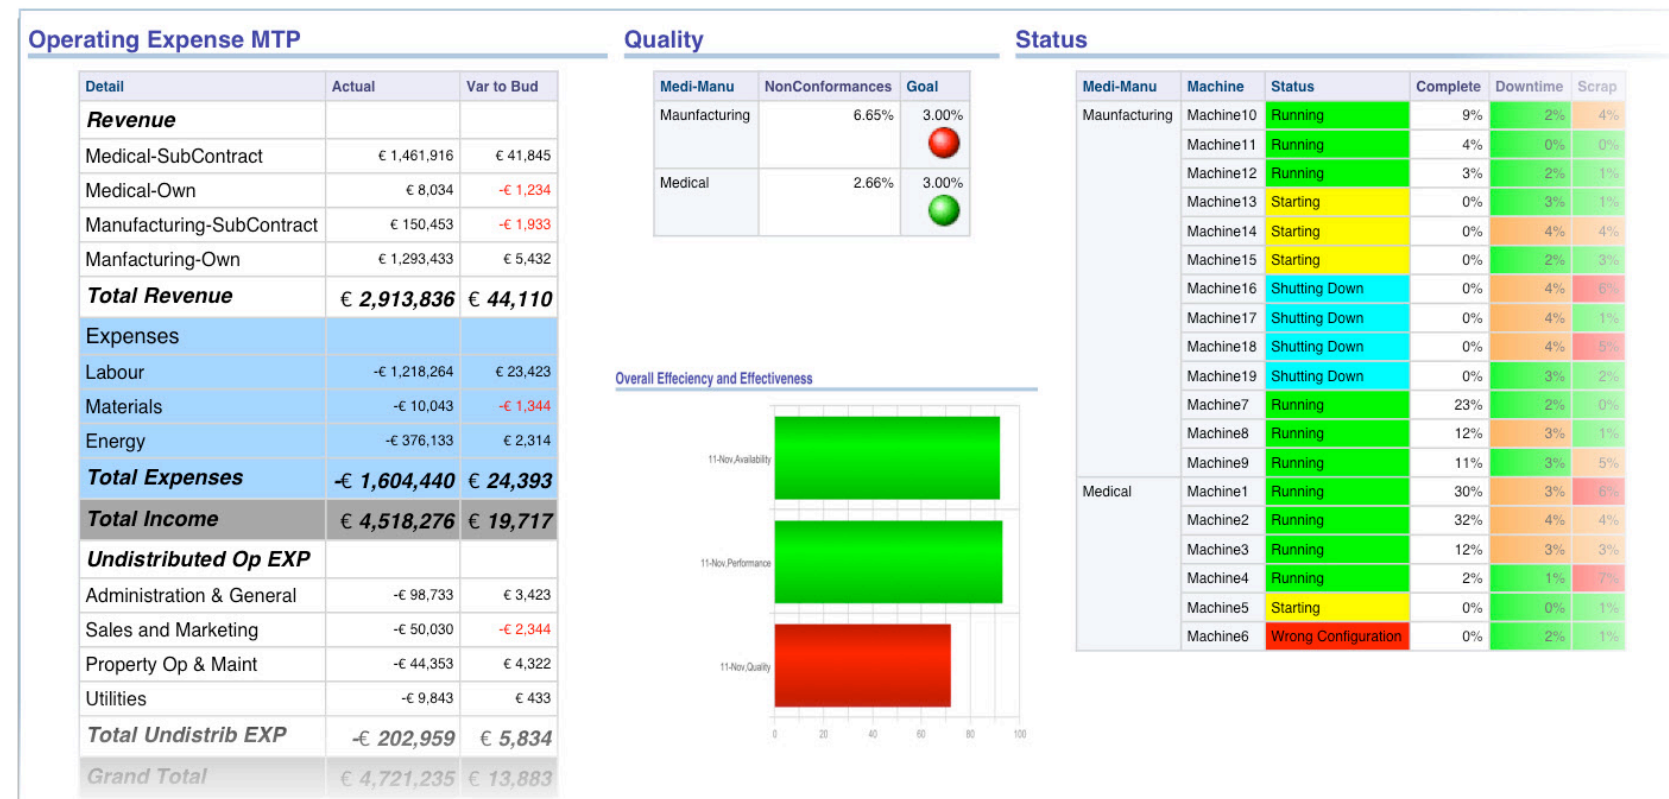

Deployed over the web, DNM's Business Intelligence Dashboard does not require installation on your PC. Our Dashboard is available to you, where-ever you are.

Real-Time Monitoring

Our Dashboard collects, stores and analyses your data in Real-Time from your underlying systems and applications.

Drill Through Analysis

Clicking on any parameter will reveal underlying detail.

Flexible Analysis

Analyse trends over any time period.
